Bulletin of
THE GEOLOGICAL INSTITUTIONS

OF

THE UNIVERSITY OF UPPSALA

Founded in 1892 by Hjalmar Sjögren

VOLUME XXXIX

Almqvist & Wiksells Boktryckeri AB

UPPSALA 1962

EDITORS

Mineralogy and Petrology
Professor Erik Norin

Palæontology and Stratigraphy
Professor Per Thorslund

Assistant Editor
Anders Martinsson

This Bulletin is financed by the Swedish Government.
Nos. 6 and 10 of this volume are printed with contributions from "Längmanska Kulturfonden" and "Vilhelm Ekmans universitetsfond", respectively.

Contents

1. Anders Martinsson: The origin of the crumina in beyrichiid ostracodes.
2. Anders Martinsson: Two assemblages of polychaete jaws from the Silurian of Gotland.
3. Folke G. Back: On a dolomite pseudo-conglomerate of probably ultrabasic origin from Dalovardo in the Caledonides of Västerbotten.
4. Hans J. Koark: Zum Gefügeverhalten des Nephelins in zwei Vorkommen alkaliner kristalliner Schiefer. „*Grennait*" *von Norra Kärr und canaditischer Gneis von Almunge (Schweden).*
5. Roland Gorbatschev: On the alkali rocks of Almunge. *A preliminary report on a new survey.*
6. Arne G. B. Strömberg: On the tectonics of the Caledonides in the southwestern part of the county of Jämtland, Sweden.
7. Arne G. B. Strömberg: Tectonic studies on a part of the southern Caledonides of Sweden.
8. Erik Wiman: Aspects of the Pre-Cambrian geology of south-eastern Värmland, Sweden.
9. Valdar Jaanusson: The Lower and Middle Viruan sequence in two borings in Östergötland, Central Sweden.
10. Valdar Jaanusson: Two Plectambonitacean brachiopods from the Dalby limestone (Ordov.) of Sweden.
11. Roland Gorbatschev: *Deep boring on Gotska Sandön.* II. The Pre-Cambrian sandstone of the Gotska Sandön boring core.

Note to libraries and bookbinders

The last volumes of this Bulletin have been distributed in four parts, each containing a varying number of articles, numbered and paginated in one series for the entire volume. Starting with volume XXXIX the Bulletin will be distributed in numbers with individual pagination, issued at irregular intervals. Title-page and table of contents will be supplied with the last number of each volume. The volumes will contain about 400 pages.

The Bulletin is distributed by the Uppsala University Library in exchange for foreign scientific periodicals. It is also obtainable through Messrs. Almqvist & Wiksell, Publishers and Boksellers, Stockholm.
